

# Kunststoffmuttern Rund- oder Flanschausführung für isel-Standardspindeln

für leichte Beanspruchung

Kunststoffmutter - Rundmutter

Kunststoffmutter - Flanschmutter

## Technische Daten

### Rundmutter

| Art.-Nr.    | Gewinde<br>d1 x P | b1 | d2 | F axial<br>(bei V <sub>max.</sub> )<br>[N] | V <sub>max.</sub><br>[mm/s]<br>[Vorschub] |
|-------------|-------------------|----|----|--------------------------------------------|-------------------------------------------|
| 213612 0025 | 12 x 2,5          | 25 | 24 | 123                                        | 33                                        |
| 213612 0050 | 12 x 5            | 25 | 24 | 123                                        | 66                                        |
| 213616 0050 | 16 x 5            | 30 | 28 | 179                                        | 50                                        |
| 213616 0100 | 16 x 10           | 30 | 28 | 179                                        | 100                                       |
| 213616 0200 | 16 x 20           | 30 | 28 | 179                                        | 199                                       |
| 213620 0050 | 20 x 5            | 35 | 33 | 238                                        | 40                                        |
| 213620 0100 | 20 x 10           | 35 | 33 | 235                                        | 80                                        |
| 213620 0200 | 20 x 20           | 35 | 33 | 235                                        | 159                                       |
| 213625 0050 | 25 x 5            | 40 | 32 | 381                                        | 32                                        |
| 213625 0100 | 25 x 10           | 40 | 32 | 381                                        | 64                                        |
| 213625 0200 | 25 x 20           | 40 | 32 | 386                                        | 127                                       |

### Flanschmutter
