

Servomotors

with brush drive

DC 300

DC servomotor DC 300

Features

- Servomotor with brushes
- Low-resistance winding construction
- Good dynamic response
- Two-finger brush (long working life)
- Incremental encoder with 512 pulses/turn (optional for DC 300: 1,000 pulses/turn)
- IP43 protection class/IP50 encoder

General

DC servomotors with brushes are the entry into the controlled drive technology class. They have a good dynamic response and have proved themselves in drive systems. The attached encoder enables precise positioning. This predestines their use in CNC machines and in automation systems.

Technical specification

Description	Voltage V	No-load speed rpm	No-load current A	Rated speed rpm	Rated torque Ncm	Rated current A	Rated output W	Peak current A	Part no.
DC 300	48	3,200	1	3,000	100	9	315	20	471024
